(*): Cyclic Application (see note)

Note:
 * Cyclic tyre bonus loads are permitted for traction wheels in cyclic loading operations involving minimal torque and wide fluctuation in weight carried.
 * Vehicles must be unloaded before transport outside the field.
 * Maximum load may not be carried for more than 1.5 km before unloading operation begins.
 * Maximum load per tyre includes all possible field and vehicle/usage variations.
 * For hillside operations over 11° (20%) slope, no cyclic bonus load is allowed.
 * Basic inflation pressure must be increased as per tables.

| Maximum Speed | % change in loads from 40 km/h load | Changes in Infl. Pressure |
|---------------|-------------------------------------|---------------------------|
| 10 | + 70% | +0.4 bar |
